MiniComm CAT5 Jack
 Black

Overview **Specs**

MiniComm CAT5 JackBlack- CJ588BLY

The MINI-COM TX-5e Module was specifically designed to meet increased Category 5e performance requirements. The module utilizes GIGAFIX Technology, which speeds installation and reduces conductor untwists to less than 0.4 cm to provide superior performance. The module terminates 24 AWG 100 ohm solid unshielded twisted pair cable, 24 AWG stranded twisted pair cable and does not require the use of a punchdown tool. The forward motion termination cap places localized stress on critical internal components for maximum reliability and is available for universal T568A and T568B wiring schemes. The Modules are available in thirteen standard colors and can be clearly identified with labels icons. MINI-COM Modules snap in and out of all RJ45 faceplates and modular patch panels for fast moves, add changes.

- Related to Panduit MiniComm CAT5 Jack - Black - CJ588BLY**
- [Panduit 1-Port Modular Cat5e Jack - Green - CJ5E88TR](#)
This modular Cat5e jack from Panduit is specifically designed to comply with the increased Cat5e performance requirements. It works with modular patch cables, and forward motion termination speeds installation and places no localized stress on critical internal components for maximum reliability. The jack utilizes Giga-TX Technology to optimize performance by reducing conductor untwists.
 - [Black Box GigaBase2 Cat5e Universal Jack Black - FM021](#)
The high-density, compact design of this universal Cat5e jack is ideal for multimedia applications. Its standard keystone design makes for easy mounting in GigaStation/GigaStation+ wallplates. The termination retention stuffer cap provides strain relief and serves as a 110 termination platform. Angled, staggered IDC 110 contacts and a printed circuit board design provide optimum performance. The unique universal wiring system labels...
 - [Black Box GigaBase2 CAT5e Jack - Universal Wiring - Office White - Z5 - pack - FMT925-R2-25PAK](#)
The Black Box GigaBase2 Cat5e jack features the following: IDC contacts are phosphor bronze with tin plating, nose contacts feature 50 -micron gold plating over 100-micron nickel underplating, make easy terminations using a 110 tool, a termination retention stuffer cap that provides strain relief while enabling you to easily check terminations, keystone style for snap-in installation, labeled with both T568A and...
