Male connector, 769 Series, CAGE CLAMP®

This male connector (item number 769-610/002-000) simplifies electrical installations. Pluggable rail-mount terminal blocks are hugely popular in switchgear and control systems, for example, in railroad technology. They combine the best of rail-mount terminal blocks and connectors to create the perfect solution. Variable wiring systems make pre-assembly easy, which saves both time and money in production, installation, operation, and maintenance. Our pluggable rail-mount terminal block is rated for 500 V and is designed to handle a rated current of up to 32 A. Strip lengths must be between 8 mm and 9 mm when connecting conductors to this male connector. This product features conductor terminals and utilizes CAGE CLAMP®. Our proven universal connection known as CAGE CLAMP® is the industry standard for connection technology and electrical interconnections. Depending on the type of conductor, this male connector is ideal for conductor cross sections ranging from 0.08 mm² to 4 mm². You can connect ten potentials / ten poles using the ten clamping points. The gray housing is made of polyamide (PA66) for insulation. This male connector/plug is operated with an operating tool. The front-entry wiring makes it possible to connect copper conductors.
